

## sempreAqua® PS 20

The sempreAqua® PS 20 water dispenser from rheavendors servomat offers the most innovative technologies to enjoy filtered table water every day. This model combines power and elegance. It offers up to 20 litres of consistently cooled and carbonated water per hour. Perfect for small offices, practices, or lounges to provide 10 to 30 people with drinking water around the clock.

The patented technologies Tyfon®, Cool-Hybrid® and Karbony® promise the best water quality, lowest energy consumption and safety functions. Tyfon® technology for clean water through cold plasma technology. Not only the dispensing area, but also the drip tray is kept permanently germ-free.

Intensely sparkling water that stays fresh for a long time - even in unsealed containers. The patented Karbony® system enables up to 2.2 litres of sparkling water in just 35 seconds with the perfect balance between water temperature and carbonic acid content.

The model sempreAqua® PS (Power Speed) is made of high-quality materials. The mixture of stainless steel, glass and light fits into almost any room design. Logos and graphics can be shown on the 4.3-inch touch display.

Thanks to the external connection for water filter and CO<sub>2</sub> supply, replacement is possible without much effort. A Brita filter is included ex works.

You have the option of enjoying three different types of water. The water can also be dispensed in two different pre-programmed quantities.

### Technical data

- Dimensions: width 196 mm, depth 520 mm, height 432 mm
- Dispensing height: 290 mm
- Weight: 19 kg
- Voltage: 230 V
- Power: 160 W, 180 l/h pump flow rate
- Water connection: 3/8" BSP
- Cooling capacity: 60 l/h - Δ 10°C
- Coolant: R600 a
- Temperature: 4 - 12° C
- Carbonator: 1.6 l
- Drip tray: 600 ml
- Full touch display 4.3-inch, LED lighting
- Patented technologies: Cool Hybrid®, Karbony®, Tyfon®
- Drinks menu: still, medium or sparkling, unchilled, chilled or CO<sub>2</sub> chilled
