

## sempreAqua® PS 60

The sempreAqua® PS 60 water dispenser from rheavendors servomat offers the most innovative technologies to enjoy filtered table water every day. This model combines power and elegance. Up to 60 litres of water per hour can be consistently cooled and mixed with CO<sub>2</sub>.

Perfect for offices, authorities or restaurants and anywhere where there are peak times or where the supply of 30 to 100 people must be guaranteed on a permanent basis.

The patented technologies Tyfon®, Cool-Hybrid® and Karbony® promise the best water quality, lowest energy consumption and safety functions. Tyfon® technology for clean water through cold plasma technology. Not only the dispensing area, but also the drip tray is kept permanently germ-free.

Intensely sparkling water that stays fresh for a long time - even in unsealed containers. The patented Karbony® system enables up to 2.2 litres of sparkling water in just 35 seconds with the perfect balance between water temperature and carbonic acid content.

The model sempreAqua® PS (Power Speed) is made of high-quality materials. The mixture of stainless steel, glass and light fits into almost any room design. Logos and graphics can be shown on the 4.3-inch touch display.

Thanks to the external connection for water filter and CO<sub>2</sub> supply, replacement is possible without much effort. A Brita filter is included ex works.

You have the option of enjoying three different types of water. The water can also be dispensed in two different pre-programmed quantities.

### Technical data

- Dimensions: width 210 mm, depth 517 mm, height 528 mm
- Dispensing height: 327 mm
- Weight: 24 kg
- Voltage: 220-240 V
- Power: 310 W, 180 l/h pump flow rate
- Water connection: 3/8" BSP
- Cooling capacity: 60 l/h - Δ 10°C
- Coolant: R290
- Temperature: 4 - 12° C
- Carbonator: 2.7 l
- Drip tray: 800 ml
- Full touch display 4.3-inch, LED lighting
- Patented technologies: Cool Hybrid®, Karbony®, Tyfon®
- Drinks menu: still, medium or sparkling, unchilled, chilled or CO<sub>2</sub> chilled
- Jug function
